News Release

Reference: Griswold Pumps

Effective November 20, 2007, Rotating Right Inc. of Edmonton, Alberta, is pleased to announce that we have become the sole distributor of the Griswold Pump Line for Western Canada.

Frank Palucci, Wilden's Typhoon Global Product Manager, was pleased to see the experience and product knowledge of Rotating Right's inside and outside sales team. Frank commented "From what I saw while I visited your company I see great positive results with Rotating Right as the Sole distributor of our Griswold Pump Line."

Griswold Pump Company is a well established full-line pump manufacturer, with product lines dating back over 70 years. At Griswold's facility in Thomasville Georgia, Griswold designs and manufactures a variety of pumps, including ANSI, end suction centrifugals, self-priming and submersible/vertical turbines. With hundreds of thousands of pump installations worldwide, Griswold serves a broad range of chemical process, industrial and municipal applications. Griswold's ANSI pumps offer near complete exchangeability with Goulds 3196 line.

According to Len Kerekanich, President of Rotating Right, the Griswold Pump Line will broaden our product depth and allow us to offer to our customers a quality pump with the best delivery in the business. Factory inventory, combined with a worldwide network of stocking distributors, enables Griswold to offer a 36-hour shipping commitment, assuring customers that their emergency needs are met, not only with the utmost urgency, but also without premium charges.

Rotating Right specializes in the **Sales, Application and Service of Surface Pumping Systems, Subsurface Artificial Lift Systems, Engines, Generators and Electric Motors.**
