## Field Service

- 24/7 Field Service Response
- Annual Maintenance Contracts
- Factory Trained Experienced Technicians
- Stocking Spare Parts Distributor

### ***Pump Overhaul Procedure:***

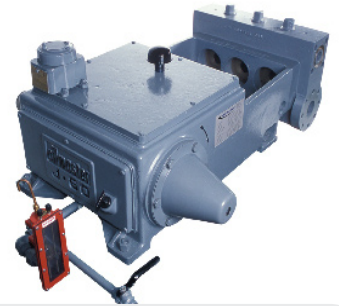

- The pump is carefully disassembled and all critical clearances and dimensions are recorded.
- All components are then prepared for sandblasting and cleaning.
- A thorough inspection is performed for wear, corrosion and wash out damage, all critical dimensions and tolerances are double checked.
- Upon completion of the inspection you are provided with a detailed scope of work for the repairs as well as a firm quotation for the costs associated with the pump repair.
- After your approval the repair begins. All components requiring repairs are meticulously repaired and components in need of replacement are replaced with either OEM parts or high quality after market parts. (your preference)
- (All our after market parts meet or exceed OEM specifications.)
- Lastly, the pump is painted and re-assembled back to the original equipment manufacturer specifications.
