## Keep It Together With seepex Pumps!

Our Experts Can Handle Your Meat Applications

The new portable vertical hopper can handle whole deboned meats (chicken breast, thighs, livers, etc.) without causing shear and maintaining the integrity of the product.

The hopper can be fabricated to the exact dimensions required by the plant and all wetted parts are FDA compliant.

Pumps are fabricated and assembled at the seepex ISO 9001:2012 certified plant in Enon, Ohio with 95% of the components fabricated, manufactured or purchased from sources in the USA.

### **seepex Vertical Hopper Portable Pump**
